Notes:

1. This is the first version of VPAT for Exxat School Module.
2. Accessibility Improvement Process: We have diligently reviewed and addressed the accessibility issues identified within our application. We have made significant progress in enhancing the overall accessibility of our product, ensuring maximum accessibility for all users.
3. Ongoing Efforts: Our development team is actively working to fix any remaining accessibility issues. These issues primarily stem from the customization of external library components. We acknowledge that these particular customizations have introduced accessibility challenges, and we are committed to resolving them promptly.
4. Prioritizing Accessibility Fixes: We recognize the importance of providing an inclusive user experience and are allocating dedicated resources to rectify the remaining issues. Our team is actively prioritizing the resolution of these accessibility concerns to ensure compliance with accessibility standards and guidelines.

5. Timelines for Issue Resolution: We understand the urgency in addressing these outstanding accessibility issues. Our development team is actively working on implementing the necessary fixes, and we anticipate resolving all remaining issues.
6. User Feedback and Testing: We greatly appreciate any user feedback regarding accessibility concerns. If you encounter any accessibility issues while using our application, please reach out to our support team or provide feedback through our designated channels. Your input is invaluable in helping us identify and address any accessibility barriers.
7. Commitment to Accessibility: We remain dedicated to providing an accessible user experience to all individuals. We understand the importance of accessibility compliance and are continuously working towards improving our product to meet or exceed the accessibility standards and guidelines set forth by regulatory bodies.

Evaluation Methods Used:

- Screen Reader assessment – Chrome + NVDA on Windows and Safari + VoiceOver on mac.

WCAG 2.x Report

Note: When reporting on conformance with the WCAG 2.x Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.0 Conformance Requirements.

Table 1: Success Criteria, Level A

Notes: WCAG 2.2 success criteria are removed.

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A)	Partially Supports	All informative images are provided with proper text alternative except for logos present on the Notification screen. Currently site name is added as alt text. We are looking into the feasibility of providing a text box in the backend so that each site owner can define their alt text including the text present on the logo. All decorative images are hidden from assistive technologies. All actionable images and icons are provided with proper text alternative through ARIA and other suitable ways. On Explore & apply for Availability screen the current location is shown only on Azure map. We are working to provide the information on text as well.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A)	Supports	The application does not contain prerecorded audio-only or video-only media.
1.2.2 Captions (Prerecorded) (Level A)	Supports	The application does not contain prerecorded synchronized media.
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)	Supports	The application does not contain prerecorded video content that would require audio description or a media alternative.
1.3.1 Info and Relationships (Level A)	Partially Supports	Semantic information is provided in combination of both native HTML and ARIA roles and attributes. On Explore & apply for Availability the location information is shown only on Azure map view. We are working to provide the same information on text as well.
