**SIMPLIFY
ACCREDITATION
AND REPORTING
FOR YOUR PA
PROGRAM**

Physician Assistant programs face increasing complexity in meeting ARC-PA 5th Ed. requirements. Exxat Prism transforms that burden into confidence by streamlining accreditation reporting, tracking student progress, and supporting compliance with ease. With built-in tools, customizable forms, and Excel-ready reports, programs can easily prepare for site visits, evaluate student and site performance, and deliver high-quality clinical education- all in one centralized platform. Here's how Exxat Prism brings these capabilities to life:

Comprehensive Reporting:

Effortlessly align with ARC-PA standards using customizable, Excel-ready reports. Generate SCPE reports, slot distributions, site evaluations, slot tracking, evaluations, and competency tracking. Easily compile data for Self-Study Reports (SSR) Exxat Prism helps in eliminating manual tracking, removes the need for spreadsheets and reduces administrative work by up to 95%.

Securing adequate clinical sites and preceptors (Standards B3.01–B3.02):

With in-built tools such as slot request and placement limit, capture confirmed slots for all required ARC-PA settings. Get SCPE reports that allow you to upload confirmed slots by setting type directly on ARC-PA portal without further data massaging.

Student Performance & Competencies (Standards B3.03 and B4.03):

Capture and report on student competencies and outcomes across all ARC-PA categories, demonstrating readiness with auditable, standardized data. Capture evaluations and monitor student competencies across all clinical rotations. Identify gaps and ensure alignment with program-defined outcomes and ARC-PA categories. Showcase student exposure across critical settings like family medicine, emergency medicine, and more- all backed by aggregated patient logs and evaluations. Meet multiple standards with a comprehensive, evidence-based demonstration of clinical exposure.

Curriculum Mapping:

Map curriculum to ARC-PA standards, NCCPA Blueprint, and program-specific competencies. Identify gaps or redundancies and use data to drive curricular enhancements and enhance curricular effectiveness.

Ensure Preceptor Quality and assessments (Standards B3.05–B3.07):

Ensure oversight and quality of preceptorships with full visibility into contract status, site value, and supervision quality. Generate quick faculty-ready reports that illustrate the effectiveness and scope of supervised clinical experiences, including site availability, site visit documentation, and preceptor qualifications and instructional roles

Monitor Risk & Remediation (Standard B4.01b):

Identify lagging students in real time by setting up minimum thresholds, low score indicators, automated alerts, and centralized tracking keep you proactive about student support, interventions, and remediation.

Tools That Make a Difference

- Excel-Ready Reports: Upload directly to ARC-PA without reformatting.
- Customizable Evaluation Forms: Capture exactly the data you need.
- Preceptor Matching: Match students to qualified preceptors by specialty.
- Automated Alerts: Stay proactive with real-time notifications for student support.

Exxat Prism helps you confidently meet ARC-PA standards- all in one easy-to-use platform.
